Section	Questions
Self Introduction	10
Personal Background	10
Education & Academics	10
Technical & Project Discussion	15
Internship / Experience	10
Behavioral Questions	15
Situation Based Questions	10
Company Specific (LG Soft)	10
Career Goals	5
Salary / Relocation / Joining	5
Total	100

SECTION 1 – Self Introduction (Q1–Q10)

Q1. Tell me about yourself.

Answer

This is the first and most important HR question. Keep your answer structured in 60–90 seconds.

Structure:

1. Name and educational background
2. Key technical skills
3. Internship/project/experience
4. Strengths
5. Why you're interested in the role

Sample Answer

"Good morning, sir/ma'am. My name is _____. I completed my Bachelor's degree in Computer Science. During my academic journey, I developed a strong interest in C, C++, Data Structures, and problem-solving. I have worked on projects involving _____, which helped me improve my coding, debugging, and teamwork skills. I enjoy learning new technologies and solving challenging problems. I am looking for an opportunity where I can contribute, continuously learn, and grow as a software engineer."

Follow-up

- What are your strengths?
- Why should we hire you?

Q2. Walk me through your resume.

Answer

Explain each section:

- Education
- Skills
- Projects
- Internship
- Achievements
- Certifications

Never read your resume word-for-word.

Q3. Why do you want to join our company?

Answer

"I want to join your company because it is known for developing high-quality software products, working with advanced technologies, and providing excellent learning opportunities. I believe this role matches my technical skills in C, C++, and Data Structures, and I am excited to contribute while growing professionally."

Don't say:

- Good salary
- Big company only
- My friend works here

Q4. Why should we hire you?

Answer

"I have strong fundamentals in C, C++, OOP, Data Structures, and problem-solving. I learn quickly, work well in teams, and enjoy taking ownership of my work. I am confident that I can adapt quickly to your work environment and contribute effectively."

Q5. What are your strengths?

Answer

Choose 3–4 genuine strengths.

Example:

LG Soft India Pvt. Ltd.

- Quick learner
- Problem-solving
- Positive attitude
- Team player
- Adaptability
- Time management

Support each with a brief example.

Q6. What are your weaknesses?

Answer

Mention a real but improvable weakness.

Example:

"Earlier, I hesitated to ask questions immediately when I had doubts. I realized that timely communication improves learning and teamwork, so now I actively clarify issues whenever needed."

Avoid saying:

- "I have no weaknesses."
- "I'm a perfectionist."

Q7. Where do you see yourself in five years?

Answer

"In five years, I see myself as a technically strong software engineer, taking ownership of important modules, mentoring junior team members, and continuously learning new technologies while contributing to the company's growth."

Q8. What motivates you?

Answer

"I am motivated by learning new technologies, solving challenging problems, and seeing the impact of my work on real products and users."

Q9. Why should we not hire you?

Answer

"I don't believe there's a reason not to hire me. While I may not know every technology today, I am a quick learner, adaptable, and committed to improving continuously. I am confident I can quickly become productive with the right guidance."

Q10. Do you have any questions for us?

Answer

Always ask thoughtful questions.

Examples:

- What does the training process look like for new graduates?
- What technologies will the selected candidates work on?
- How is performance evaluated during the first year?
- What opportunities are available for learning and career growth?

Avoid asking about leave policies or salary in the first HR discussion.

SECTION 2 – Personal Background Questions (Q11–Q20)

These questions help the interviewer assess your personality, communication skills, values, adaptability, and attitude. Interviewers are looking for honesty, confidence, and self-awareness.

Q11. Tell me something about your family.

Answer

"My family consists of four members. My father is a businessman, my mother is a homemaker, and my sibling is pursuing higher education. My family has always encouraged me to work hard, stay disciplined, and continue learning. Their support has played an important role in shaping my career."

Follow-up Questions

- Are you close to your family?
- How has your family influenced your career?

Interview Tip: Keep the answer positive and concise. Avoid discussing family conflicts.

Q12. What are your hobbies?

Answer

"My hobbies include reading technology-related articles, solving coding problems, watching educational videos, and playing badminton. These activities help me improve my analytical thinking, stay physically active, and maintain a good work-life balance."

Follow-up Questions

- What was the last book you read?
- How does your hobby help you professionally?
- How often do you pursue your hobbies?

Interview Tip: Mention hobbies you genuinely enjoy because interviewers often ask follow-up questions.

Q13. Describe yourself in three words.

Answer

"I would describe myself as:

1. Adaptable
2. Responsible
3. Curious

I adapt quickly to new environments, take ownership of my work, and enjoy learning new technologies."

Follow-up Questions

- Can you give an example for each quality?
- Which one is your strongest trait?

Q14. What are your biggest strengths?

Answer

"My biggest strengths are:

- Quick learning ability
- Strong analytical and problem-solving skills
- Positive attitude
- Teamwork
- Time management

For example, during my academic projects, I quickly learned new concepts whenever required and collaborated effectively with my teammates to complete the project on time."

Follow-up Questions

- Which strength will help you most in this role?
- Can you provide a real-life example?

Q15. What is your biggest weakness?

Answer

"Earlier, I sometimes spent too much time trying to perfect every detail of my work. I realized that balancing quality with deadlines is equally important. Now, I prioritize tasks effectively and focus on delivering high-quality work within the given timeline."

Avoid Saying

- "I don't have any weaknesses."
- "I get angry easily."
- "I can't work under pressure."

Follow-up Questions

- How are you improving this weakness?
- What have you learned from it?

Q16. How do your friends describe you?

Answer

"My friends describe me as someone who is dependable, calm under pressure, and always willing to help others. They often approach me when they need assistance with technical concepts or problem-solving."

Follow-up Questions

- Why do they think you're dependable?
- Can you share an example?

Q17. What motivates you?

Answer

"I am motivated by opportunities to learn new technologies, solve challenging problems, and contribute to meaningful projects. Completing difficult tasks successfully and continuously improving my skills gives me a sense of achievement."

Follow-up Questions

- What motivates you when facing difficulties?
- Who inspires you?

Q18. How do you handle pressure or stressful situations?

Answer

"I believe pressure is a natural part of any professional environment. I stay calm, analyze the situation, prioritize tasks, and focus on solving one problem at a time. If needed, I communicate with my team to ensure that deadlines are met without compromising quality."

Follow-up Questions

- Tell me about a stressful situation you handled.
- What did you learn from that experience?

Q19. Are you a team player or do you prefer working alone?

Answer

"I am comfortable working both independently and as part of a team. I enjoy collaborating with others because it allows us to learn from different perspectives and solve problems more effectively. At the same time, I can work independently when required and take responsibility for my assigned tasks."

Follow-up Questions

- Have you ever had a disagreement with a teammate?
- How did you resolve it?

Q20. What is your greatest achievement so far?

Answer

"My greatest achievement has been successfully completing my academic projects while continuously improving my technical skills in C, C++, Data Structures, and problem-solving. Each project helped me apply theoretical knowledge to practical situations, improve teamwork, and build confidence in handling technical challenges."

For Experienced Candidates: Mention a significant professional achievement with measurable impact.

Follow-up Questions

- Why do you consider this your greatest achievement?
- What challenges did you face?
- What did you learn from the experience?

Section 3 – Education & Academics (10 Questions with Explanations)

(LG Soft / Technical Interview Preparation – Fresher Level)

Q1. Tell me about your academic background.

Answer:

I have completed my education in a structured manner focusing on core subjects relevant to my field. During my studies, I built a strong foundation in both theoretical concepts and practical applications.

Explanation:

This question checks your overall educational journey and relevance to the role.

Q2. Which subjects did you enjoy the most and why?

Answer:

I enjoyed subjects like Data Structures and Programming because they helped me improve logical thinking and problem-solving skills.

Explanation:

Interviewers assess your interest and strength areas.

Q3. What was your final year project about?

Answer:

My project was based on [mention your project], where I worked on designing and implementing a solution using technologies like [tools/tech].

Explanation:

This evaluates your practical knowledge and application skills.

Q4. What challenges did you face during your project work?

Answer:

I faced challenges in debugging and integrating modules, but I resolved them by researching and seeking guidance from mentors.

Explanation:

Tests problem-solving ability and persistence.

Q5. Which programming languages have you studied?

Answer:

I have studied languages such as C, C++, and Java/Python depending on my curriculum.

Explanation:

Checks technical academic exposure.

Q6. How strong are your basics in Data Structures and Algorithms?

Answer:

I have a good understanding of basic data structures like arrays, linked lists, stacks, queues, and algorithms like sorting and searching.

Explanation:

Important for technical screening.

Q7. Did you participate in any academic competitions or hackathons?

Answer:

Yes, I participated in [event name], where I worked on real-world problem solving under time constraints.

Explanation:

Shows initiative and practical exposure.

Q8. How do you manage academic pressure and deadlines?

Answer:

I prioritize tasks, create a schedule, and focus on completing important tasks first while maintaining consistency.

Explanation:

Evaluates time management skills.

Q9. What was your weakest subject and how did you improve it?

Answer:

Initially, I found [subject] difficult, but I improved by practicing regularly and revising concepts.

Explanation:

Checks self-awareness and improvement mindset.

Q10. Why should we consider your academic background suitable for this role?

Answer:

My academic background has given me strong technical foundations, problem-solving skills, and hands-on project experience relevant to this role.

Explanation:

This is a closing evaluation of academic fit.

Section 4 – Technical & Project Discussion (15 Questions with Answers + Explanations)

Q1. Explain your final year project in brief.

Answer:

My project was based on [your domain: e.g., web app / ML / software system], where I developed a solution to solve [problem statement] using [technologies].

Explanation: Evaluates clarity of technical understanding.

Q2. What technology stack did you use in your project?

Answer:

I used technologies like Python/Java, HTML/CSS/JS, database (MySQL/MongoDB), and frameworks like Flask/Django depending on the project.

Explanation: Checks technical exposure.

Q3. Why did you choose this project?

Answer:

I chose this project because it solves a real-world problem and helped me apply theoretical concepts practically.

Explanation: Tests motivation and relevance.

Q4. What was your role in the project team?

Answer:

I was responsible for design, development, and testing of specific modules and integration

with the system.

Explanation: Assesses teamwork and contribution.

Q5. How did you handle bugs in your project?

Answer:

I used debugging tools, printed logs, and tested each module individually to identify and fix errors.

Explanation: Checks problem-solving approach.

Q6. What is the difference between compilation and execution?

Answer:

Compilation converts code into machine language, while execution runs that compiled code to produce output.

Explanation: Tests basic programming concepts.

Q7. What is object-oriented programming (OOP)?

Answer:

OOP is a programming model based on objects and classes, using concepts like encapsulation, inheritance, polymorphism, and abstraction.

Explanation: Core technical concept.

Q8. Explain inheritance with an example.

Answer:

Inheritance allows a class to acquire properties of another class. Example: A "Car" class can inherit from "Vehicle" class.

Explanation: Checks OOP understanding.

Q9. What is the difference between stack and queue?

Answer:

Stack follows LIFO (Last In First Out), while Queue follows FIFO (First In First Out).

Explanation: Data structure basics.

Q10. What is a database and why is it used?

Answer:

A database is a structured collection of data used to store, manage, and retrieve information efficiently.

Explanation: Core software knowledge.

Q11. What is normalization in DBMS?

Answer:

Normalization is the process of organizing data to reduce redundancy and improve efficiency.

Explanation: Database optimization concept.

Q12. What are primary keys and foreign keys?

Answer:

Primary key uniquely identifies a record; foreign key links two tables together.

Explanation: Relational database concept.

Q13. What is the difference between HTTP and HTTPS?

Answer:

HTTP is unsecured, while HTTPS uses encryption for secure communication.

Explanation: Web basics.

Q14. What is the use of APIs?

Answer:

APIs allow communication between different software systems and enable data exchange.

Explanation: Modern software integration concept.

Q15. How would you improve your project if given more time?

Answer:

I would add more features, improve UI/UX, optimize performance, and enhance security.

Explanation: Shows improvement mindset and scalability thinking.

Section 5 – Internship / Experience (10 Questions with Answers + Explanations)

Q1. Have you done any internship? If yes, explain it.

Answer:

Yes, I completed an internship in [Company/Institute name], where I worked on [project/domain] and learned practical implementation of my academic knowledge.

Explanation: Checks real-world exposure.

Q2. What was your role during the internship?

Answer:

My role involved assisting in development/testing, data handling, and supporting the team in completing assigned tasks.

Explanation: Evaluates responsibility and contribution.

Q3. What skills did you learn during your internship?

Answer:

I learned technical skills like coding, debugging, teamwork, and tools like Git, databases, or frameworks depending on my project.

Explanation: Assesses learning outcome.

Q4. What challenges did you face in your internship?

Answer:

I faced challenges in understanding real-time systems, but I overcame them by learning from seniors and practicing regularly.

Explanation: Tests adaptability.

Q5. How is internship different from academic projects?

Answer:

Internships are real-world, deadline-driven, and require teamwork, whereas academic projects are more guided and theoretical.

Explanation: Evaluates industry awareness.

Q6. Did you work in a team during your internship?

Answer:

Yes, I collaborated with team members, shared responsibilities, and used communication tools to coordinate tasks.

Explanation: Tests teamwork skills.

Q7. What tools or technologies did you use?

Answer:

I used tools like VS Code, GitHub, databases, and frameworks depending on the project requirements.

Explanation: Checks technical exposure.

Q8. What did you contribute personally in the internship project?

Answer:

I contributed by developing specific modules, fixing bugs, and assisting in testing and documentation.

Explanation: Evaluates individual contribution.

Q9. What did you learn about the industry from your internship?

Answer:

I learned about deadlines, collaboration, code quality standards, and real-world problem-solving approaches.

Explanation: Shows industry readiness.

Q10. How will your internship experience help you in this job?

Answer:

It has given me practical exposure, improved my technical skills, and prepared me to handle real-time work efficiently.

Explanation: Connects experience to job role.

Section 6 – Behavioral Questions (15 Questions with Answers + Explanations)

Q1. Tell me about a time you worked in a team.

Answer:

During my project/internship, I worked in a team where we divided tasks based on strengths and coordinated regularly to complete the project successfully.

Explanation: Checks teamwork and collaboration skills.

Q2. How do you handle pressure or tight deadlines?

Answer:

I prioritize tasks, break them into smaller steps, and focus on completing important tasks first while staying calm.

Explanation: Tests stress management.

Q3. Describe a situation where you faced failure.

Answer:

In one project/task, I initially failed to implement a feature correctly, but I learned from mistakes and improved it after debugging and guidance.

Explanation: Evaluates resilience and learning attitude.

Q4. How do you resolve conflicts in a team?

Answer:

I prefer discussing issues calmly, understanding different viewpoints, and finding a mutual solution that benefits the team.

Explanation: Tests interpersonal skills.

Q5. What motivates you to do your best work?

Answer:

Learning new skills, solving real-world problems, and achieving goals motivates me to perform better.

Explanation: Assesses motivation.

Q6. How do you manage your time effectively?

Answer:

I use planning, to-do lists, and prioritize tasks based on urgency and importance.

Explanation: Checks time management.

Q7. Tell me about a mistake you made and how you handled it.

Answer:

I once misunderstood a requirement, but I corrected it after feedback and ensured better communication in future tasks.

Explanation: Tests accountability.

Q8. How do you handle criticism?

Answer:

I take criticism positively and use it as an opportunity to improve my skills and performance.

Explanation: Evaluates attitude toward feedback.

Q9. What do you do when you don't know how to solve a problem?

Answer:

I try to research, refer documentation, and seek help from mentors or colleagues when needed.

Explanation: Tests problem-solving approach.

Q10. How do you stay updated with technology?

Answer:

I follow online resources, technical blogs, and practice coding regularly.

Explanation: Shows continuous learning mindset.

Q11. Describe a situation where you took initiative.

Answer:

I once suggested improvements in my project workflow that helped the team complete tasks faster.

Explanation: Evaluates leadership potential.

Q12. How do you ensure quality in your work?

Answer:

I double-check my work, test thoroughly, and follow best practices.

Explanation: Focuses on quality awareness.

Q13. What do you do if a team member is not contributing?

Answer:

I try to understand their issues and encourage them, and if needed, inform the team lead politely.

Explanation: Tests leadership and maturity.

Q14. How do you react to unexpected changes in requirements?

Answer:

I adapt quickly, re-plan tasks, and focus on delivering updated requirements efficiently.

Explanation: Tests flexibility.

Q15. Why should we hire you?

Answer:

I have strong technical basics, a positive attitude, and eagerness to learn and contribute to the company.

Explanation: Closing confidence question.

Section 7 – Situation Based Questions (10 Questions with Answers + Explanations)

Q1. What will you do if a project deadline is approaching and your work is incomplete?

Answer:

I will prioritize critical tasks, extend my working hours if needed, and inform my team lead early to manage expectations.

Explanation: Tests responsibility and urgency handling.

Q2. If your teammate is not completing their part, what will you do?

Answer:

I will first communicate with them to understand the issue and offer help. If the problem continues, I will inform the team lead politely.

Explanation: Evaluates teamwork and maturity.

Q3. What will you do if you find a major bug just before submission?

Answer:

I will immediately analyze the bug, fix it if possible, and test the solution thoroughly before submission.

Explanation: Checks problem-solving under pressure.

Q4. If you are assigned a task you don't know, how will you handle it?

Answer:

I will research the topic, refer documentation, and seek guidance from seniors while trying to learn quickly.

Explanation: Tests learning ability.

Q5. What will you do if your senior gives you negative feedback?

Answer:

I will take it positively, understand my mistakes, and work on improving my performance.

Explanation: Checks attitude toward feedback.

Q6. If two tasks are equally important, how will you decide priority?

Answer:

I will check deadlines, complexity, and business impact before deciding priority.

Explanation: Evaluates decision-making skills.

Q7. What will you do if your code is not working and you are stuck?

Answer:

I will debug step by step, check logs, and review logic or ask for help if needed.

Explanation: Tests persistence and debugging approach.

Q8. If a client/user is unhappy with your work, how will you respond?

LG Soft India Pvt. Ltd.

Answer:

I will listen carefully, understand their concern, and try to improve or fix the issue professionally.

Explanation: Tests professionalism.

Q9. What will you do if you make a mistake in production code?

Answer:

I will immediately inform my team, help in fixing the issue, and ensure it does not happen again.

Explanation: Evaluates accountability.

Q10. If you are given multiple tasks at the same time, how will you manage?

Answer:

I will organize tasks based on priority and deadlines and use time management techniques to complete them efficiently.

Explanation: Tests multitasking ability.

Section 8 – Company Specific (LG Soft) Questions (10 Questions with Sample Answers + Explanations)

Q1. What do you know about LG Soft?

Sample Answer

LG Soft India is the research and development center of **LG Electronics**. It develops software solutions for products such as smart TVs, home appliances, automotive infotainment systems, AI, IoT, and embedded systems. The company focuses on innovation, quality, and creating smart technologies that improve users' everyday lives.

Explanation

The interviewer wants to know whether you researched the company before the interview. Mention the company's business areas and focus on innovation.

Q2. Why do you want to join LG Soft?

Sample Answer

I want to join LG Soft because it offers opportunities to work on real-world products that are used globally. I am excited about learning from experienced engineers, improving my technical skills, and contributing to innovative software solutions. I also appreciate the company's emphasis on continuous learning and teamwork.

Explanation

Relate your career goals to what the company offers instead of focusing only on salary or brand name.

Q3. Why should we hire you?

Sample Answer

Although I am a fresher, I have a strong foundation in programming, data structures, and problem-solving. I am a quick learner, adaptable to new technologies, and enjoy working in teams. I am confident that with proper guidance, I can become a productive member of the organization.

Explanation

Highlight your strengths, willingness to learn, and positive attitude.

Q4. What do you know about our products?

Sample Answer

LG develops a wide range of consumer electronics, including smart TVs, washing machines, refrigerators, air conditioners, monitors, laptops, and automotive software solutions. Many of these products include AI and IoT features that enhance user experience.

Explanation

Interviewers expect candidates to know the company's major product categories.

Q5. Why should we choose you over another candidate?

Sample Answer

I believe my combination of technical knowledge, learning attitude, discipline, and teamwork makes me a strong candidate. I am willing to take ownership of my work, continuously improve my skills, and contribute positively to the organization.

Explanation

Avoid criticizing other candidates. Focus on your own strengths.

Q6. Are you comfortable learning new technologies

quickly?

Sample Answer

Yes. Technology evolves rapidly, and I enjoy learning new tools and programming concepts. During my academic projects, I learned new technologies whenever required, and I am confident I can continue doing so professionally.

Explanation

LG Soft values continuous learning because projects often require new technologies.

Q7. How would you handle working on a project outside your comfort zone?

Sample Answer

I would first understand the project requirements, study the necessary technologies, ask relevant questions, and seek guidance from experienced team members while contributing wherever possible.

Explanation

Shows adaptability and willingness to learn.

Q8. Where do you see yourself in five years at LG Soft?

Sample Answer

In five years, I see myself as a skilled software engineer who has contributed to multiple successful projects. I hope to take on greater responsibilities, mentor junior engineers, and continue learning advanced technologies.

Explanation

Demonstrates ambition while showing commitment to growth.

Q9. Are you comfortable relocating or working in different shifts if required?

Sample Answer

Yes. I understand that project requirements may involve relocation or flexible work schedules. I am comfortable adapting to business needs and believe it will help me grow professionally.

Explanation

Companies often ask this to assess flexibility.

Q10. Do you have any questions for us?

Good Questions to Ask

- What does the training program for freshers look like?
- What technologies will I primarily work with?
- How is performance evaluated during the first year?
- What qualities do your best-performing engineers have?
- What learning opportunities and certifications does the company support?

Explanation

Always ask thoughtful questions. Avoid asking only about salary, leave policies, or promotions in the first interview unless the interviewer brings them up.

Section 9 – Career Goals (Q96–Q100)

Q96. What are your short-term career goals?

Sample Answer

My short-term goal is to build a strong foundation as a software engineer by learning the company's technologies, contributing to real projects, and improving my technical and problem-solving skills. I also want to become a dependable team member who consistently delivers quality work.

Explanation

The interviewer wants to know whether your immediate goals align with the role. Focus on learning and contributing rather than promotions.

Q97. What are your long-term career goals?

Sample Answer

In the next five to ten years, I see myself as an experienced software engineer leading challenging projects, mentoring junior team members, and continuously upgrading my technical skills. I want to contribute to the development of innovative products that have a global impact.

Explanation

Show ambition, but make it realistic. Demonstrate a commitment to continuous growth.

Q98. Where do you see yourself in five years?

Sample Answer

In five years, I hope to become a technically strong software engineer who has successfully delivered multiple projects. I also want to take on more responsibility, improve my leadership skills, and contribute to the company's success.

Explanation

Avoid saying that you plan to leave the company or start another career soon.

Q99. How do you plan to improve your technical skills after joining?

Sample Answer

I plan to learn from experienced colleagues, participate in technical training, practice coding regularly, read technical documentation, and work on challenging projects. I believe continuous learning is essential in the software industry.

Explanation

LG Soft values employees who are eager to learn new technologies.

Q100. What defines success for you?

Sample Answer

For me, success means continuously learning, solving meaningful problems, delivering quality work, earning the trust of my team, and making a positive contribution to the organization while growing professionally.

Explanation

Focus on growth, contribution, and learning rather than only money or position.

Section 10 – Salary, Relocation & Joining (Q101–Q105)

Q101. What are your salary expectations?

Sample Answer

As a fresher, my primary goal is to learn and build my career. I am comfortable with the company's standard compensation package for this role and am more interested in the opportunity to grow professionally.

Explanation

Freshers should avoid demanding unrealistic salaries unless specifically asked to negotiate.

Q102. Are you willing to relocate?

Sample Answer

Yes, I am comfortable relocating if required by the company. I understand that working in different locations can provide valuable learning opportunities and help me grow professionally.

Explanation

Many companies prefer candidates who are flexible about location.

Q103. Are you comfortable working in different shifts if the project requires it?

Sample Answer

Yes. I understand that project requirements and client needs may require flexible working hours. I am willing to adapt and support the team's objectives.

Explanation

Shows flexibility and professionalism.

Q104. How soon can you join?

Sample Answer (If Available Immediately)

I can join immediately after completing the required joining formalities.

Sample Answer (If Serving Notice Period)

I will need to complete my notice period and can join immediately afterward.

Explanation

Be honest about your availability.

Q105. Is there anything else you would like us to know about you?

Sample Answer

I am a quick learner with a positive attitude and a strong willingness to work hard. I enjoy solving problems, learning new technologies, and collaborating with teams. If given the opportunity, I will give my best to contribute to the company's success while continuously improving my skills.

Explanation

This is your final opportunity to leave a positive impression. End confidently and enthusiastically.
